

## Prompt

User wants a weather app UI.

## Side A

A: clean navbar, big temp card, hourly chips

## Side B

B: dense layout, many toggles, small font

## Q1:

☒ Yes-fully   ☐ Yes-partially   ☐ No

## Q2:

Options: A is much better | A is better | about the same | B is better | B is much better | both are bad

Selected: B is better

## Q2 explanation

B uses clearer contrast and spacing; typography hierarchy is stronger.

## Q3:

Options: A is better | B is better | tie | both are bad

Selected: A is better

## Q3 explanation

A covers hourly and daily with fewer clicks; error empty states are present.

## Q4:

Options: A is better | B is better | tie | both are bad

Selected: A is better

## Q4 explanation

A feels faster and the input validation is clearer.

## Q5:

Options: A is better | B is better | tie | both are bad

Selected: A is better

## Q5 explanation

Overall A is better: clearer hierarchy, broader features, better functionality. Rating 4/5.
